## ## About

---

Software engineer with around 10 years of experience building data-intensive systems in logistics, food delivery, finance and public sector domains.

## ## Work

---

### ### Extended Hire Charge – *IFCO Digital*

2024 – Present

Accounting and invoicing system that charges customers for over-utilization when assets are kept beyond the contractually agreed period. Backend engine for high-volume, deterministic financial calculations and invoicing. Front-end for customer-facing portal and reporting.

Java 25 • React • TypeScript • PostgreSQL • Redis • ActiveMq • Docker • Azure • K8s • Maven • Grafana

### ### European Parliament Elections – *Scyt1 SA*

2021 – 2024

Engine that generated and updated European Parliament websites from incoming data batches from multiple sources. Then deployed on AWS with up-to-date content for the 2024 EU elections. The system also integrated with X (Twitter) for public information distribution and Signal for internal information distribution.

Java 17 • Angular • Accesibility • AWS • Maven • Oracle • Kafka • Redis • Splunk • Jenkins

### ### Ripple Client Service – *Modulr*

2020 – 2021

Integration bridge that processed data in batch and performed accounting for Ripple-currency payments (XRP – SEPA) within Modulr.

Kotlin • Ktor • Gradle • PostgreSQL • Kafka • Redis • Docker • AWS • Jenkins

### ### Growth Team & Rappi Credits – *Rappi*

Mar – Sept 2020

Engine that processed offers configured by the business team to determine which applied to the logged-in customer. Offers included in-app discounts and RappiCredits cashback. The system was built for high request throughput.

Java 11 • Kotlin • Node.js • PostgreSQL • MongoDB • Kafka • Redis • Jenkins • SignalFX

### ### UAE Parliament Elections – *for Scyt1 at Amaris*

2018 – 2020

Election platform for the United Arab Emirates parliament. On-site control room during mock and live elections; direct client liaison for technical resolution and successful delivery.

Monolith – Java 8 • Spring Boot • Spring Data • Spring Web • Spring Security • Oracle • Jenkins • Ansible • OpenStack

### ### Investor's Branch – *Citibank*

2016 – 2018

Application for traders and sales: accounting and reconciliation with other systems for fixed-income instruments (bonds). I had to learn the bond yield curve for coupon payment calculations and the different bond types in order to implement the business logic.

Java 8 • Hibernate • Oracle

## ## Education

---

### ### Associate of Science: Cloud System and Services

Universitat Oberta de Catalunya – Barcelona, Spain

### ### Bachelor of Science: Software Development

Universidad Tecnológica Nacional – Buenos Aires, Argentina

### ### IELTS – Cambridge English Language Assessment

Overall Band Score 6.5 (B2/C1)
